REASONS FOR ALLOWANCE

The following is an Examiner's Statement of Reasons for Allowance: the combination of elements as claimed is deemed to be directed to an unobvious improvement over the invention patented by Yasuda et al. Yasuda et al discloses a hydraulic continuously variable transmission comprising a motor swash plate (34, 37) supported by a swash plate support member (38); an output shaft (18) supported by a ball bearing (49), which is supported by the swash plate support member, wherein the bearing has an inner race, which is not recessed relative to an outer race on a side facing the motor swash plate. This improvement comprises that the inner race of the bearing is recessed relative to the outer race on the side facing the motor swash plate.

Although ball bearings are known to have an inner race, which is recessed relative to an outer race, as shown by Stoll et al; there is no motivation to combine these bearings with Yasuda et al, to meet the limitations of these claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, preferably **accompanies** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
